STRATEGY

PROBLEM STATEMENT (ONE SENTENCE). WHAT THIS STACK SOLVES THAT NO CURATED LIST COVERS.

No curated Claude skill stack delivers adversarial, evidence-demanding strategy diagnostics — founders get generic AI tools,

ICP (BUYER / USER). ROLE PLUS COMPANY STAGE. NOT 'EVERYONE'.

Founders and CMOs at Series A-C B2B companies; strategy consultants and advisors who run executive workshops.

OUTCOME PROMISE. CONCRETE DELIVERABLE THE USER WALKS AWAY WITH.

Structured diagnostic outputs (positioning audits, competitive analyses, brand assessments) written to ./<skill>-output/ — read

ONE-SENTENCE 'WHY THIS EXISTS' THAT SURVIVES A 10-SECOND SKIM.

18 adversarial strategy frameworks, installable in one command, that demand evidence not platitudes.
